PROFESSIONAL SUMMARY

Product professional with 7+ years of experience spanning Product Management, Analytics, Data Engineering, and Enterprise SaaS. Proven track record of building and scaling AI-driven B2B products from concept to deployment across global retail organizations. Experienced in product strategy, roadmap execution, customer discovery, product development, stakeholder management, data platform onboarding, and cross-functional leadership. Strong domain expertise in Supply Chain Management, Inventory Optimization, Retail Planning, and Decision Intelligence.

PROFESSIONAL EXPERIENCE

Senior Business Analyst | Product Management

Impact Analytics | Bengaluru, India

Jul 2024 – Present

Inventory Smart (Ordering) — AI-Powered Inventory Planning Platform

- Owned the end-to-end product lifecycle of the **Ordering module** within Inventory Smart, driving product strategy, roadmap prioritization, requirements definition, workflow design, and feature delivery from concept to production.
- Led the development of a scalable AI-driven inventory ordering platform from **0→1**, enabling retailers to optimize replenishment decisions, reduce stockout risk, and improve inventory productivity across Distribution Centers and Stores.
- Collaborated with a cross-functional team of **18+ stakeholders** across Product, Engineering, QA, Data Science, Solution Consulting, and Business Analysis to deliver enterprise-grade inventory planning capabilities.
- Successfully launched and scaled the platform across **7 enterprise retailers** in the US and Australia, including Carter's, FIGS, Cracker Barrel, Spanx, Victoria's Secret, Lovisa, and Briscoe Group, with additional customer implementations in progress.
- Defined and delivered key product capabilities including **Automated Order Recommendations, Purchase Order Expedite, Safety Stock Optimization, Immediate Order Recommendations, and PO Rebalancing**, improving planner decision-making and inventory responsiveness.
- Drove adoption of AI-generated replenishment recommendations across customer accounts, achieving approximately **30% recommendation acceptance rates** and establishing a strong foundation for product expansion and continuous optimization.
- Partnered directly with customer planning and allocation teams to gather requirements, validate workflows, conduct UAT, and translate complex supply-chain challenges into scalable product solutions.
- Supported inventory planning operations for **100+ planners and allocators**, providing actionable inventory visibility and recommendation-driven workflows that reduced manual intervention and improved decision speed.
- Delivered **3+ major feature enhancements post-launch**, leveraging customer feedback, product analytics, and business priorities to continuously improve adoption, usability, and business value.

Senior Data Analyst

KreditBee | Bengaluru, India

Oct 2023 – Jun 2024

Marketing Analytics – Driving Partnership Channel

- Managed portfolios of **15+ financial partners daily**, delivering insights on lending business performance including lead conversion, cost-to-conversion, and funnel analysis.
- Developed and maintained dashboards providing financial insights that enabled faster strategic decision-making across partner teams.
- Delivered data-driven strategies that boosted partner's monthly disbursement revenue from **1–2 Cr to 8–9 Cr**, representing a **~5–7x growth**.
- Built new business partnerships to drive customer acquisition and generate revenue growth.
- Developed innovative marketing campaigns that drove substantial sales uplift across lending products.
- Identified performance bottlenecks and devised strategies to resolve recurring database and pipeline issues.

Apprentice Leader | Senior Decision Scientist

Mu Sigma | Bengaluru, India

Oct 2019 – May 2023

Australia Bank and Insurance

Reinsurance Pools for Cyclone, Senior Decision Scientist

- Helped the client to meet regulatory requirements for the Australian Reinsurance Pool for Cyclone (ARPC) insurance coverage by identifying property risk for Individual, Strata, and Small Business segments.
- Led a team of **5 members** to perform analysis and develop data assets satisfying ARPC compliance requirements, enabling accurate portfolio and operational reporting.
- Identified a-synchronized Corporate Property policy assets directly impacting **~750M AUD** in potentially uninsured exposure.

Digital Sales & Automate Quote Capability, Senior Decision Scientist

- Enabled Digital Sales capability and automated online quote generation for Bike and Car products, delivering **~0.9M AUD** benefit in Q4 FY22.
- Engaged with senior stakeholders, analyzed multiple data stages, and designed data pipelines to drive key decisions for customers owning Classic vehicles.
- Performed end-to-end development to fulfill business requirements and automate Motor Vehicle quote generation, enhancing Digital Sales performance.

Bank Design & Distribution Obligations, Decision Scientist

- Designed a new consumer protection framework moving away from disclosure-reliant models, introducing distribution measures to ensure products reached the right Target Market Definition (TMD).
- Led a team of **4 members** to deliver an analytical dashboard enabling the business to monitor TMD compliance, reducing manual efforts and time consumption.
- Developed a scalable BI solution with a defensible framework to validate product suitability and customer value.

Life Insurance Analytics, Data Engineer

- Led data platform migration for Australia's largest General Insurer post Life Insurance divestment (**~15 data sources**), ensuring regulatory compliance and saving **2.5M–2.7M AUD**.
- Collaborated with business stakeholders and technical SMEs to create a strategic solution for migrating and remediating Life business data.
- Synthesized large datasets into actionable insights, identifying the presence of Life data within **~5,000** focused objects.
